Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hatley et al (US Patent 6,025,813).

Hatley et al disclose, in figure 7, an antenna device comprising a first loop antenna 1, and a second loop antenna 2 which is provided to be along the first loop antenna. Since the length of the first and second antennas are different, it is inherent they receive different frequency bands.

4. Claims 1, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Vernon (US Patent 6,252,550).

Vernon discloses, in figure 1, an antenna device comprising a first loop antenna (21,13)1, and a second loop antenna (17,18) which is provided to be along the first loop antenna. Since the length of the first and second antennas are different, it is inherent they receive different frequency bands.

5. Claims 1, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al (US Patent 6,288,493).

Lee et al disclose, in figure 3a, an antenna device comprising a first loop antenna 300a, and a second loop antenna 300b which is provided to be along the first loop antenna. Since the length of the first and second antennas are different, it is inherent they receive different frequency bands.

Allowable Subject Matter

6. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The patents to Lee et al, Vernon, and Hatley et al do not teach the first loop that comprises a tube having an inner space portion and the second antenna is housed in the inner space portion.

7. The patents Van Voorhies, Misic et al, Foard, and Murdoch are cited as of interest showing the loop antenna similar to that disclosed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
